A Webinar on the topic "Chemist is the Catalyst" scheduled on 1st July 2020 at 11.00 AM was organized by Department of chemistry and Research Centre and IQAC of Pope's college (Autonomous). The session was presided over by Mr. Alfred Devanesan Samuel, Senior Consultant, (Design Research Lab)-Infosys, who firstly commended all the students and research scholars for their interest of learning chemistry during the lockdown through online mode.

Students, research scholars, and staff members from our chemistry department, as well as research scholars from other colleges, attended this session. The session provided clear idea and understanding of Research and Opportunities in Chemistry. This webinar has over 280 registered attendees. The webinar was delivered via a Zoom link and the E - certificates are issued within one week. Dr. Ilavarasi Jeyamalar the webinar's coordinator expressed her gratitude to the Principal, Secretary, and IQAC coordinator for providing a platform for students' knowledge enrichment, as well as Mr. Alfred Devanesan Samuel, Senior Consultant, (Design Research Lab)-Infosys, for his innovative speech.

Focus of the Webinar

(Taken from My Message about this Webinar)

All our researches are oriented towards conservation of energy and mass in the areas of nano, drug design, green synthesis, characterization, energy harvests, solar cell, energy storage, batteries, electrodes, electrolytes, pollutions and so on. In the modern era of research, no research is accepted without incorporating the applications of the compound or material we prepare. At present we are in the age of evidence based study, that is without blood test or other tests like X-ray, scan etc., the doctor wouldn't prescribe a medicine. Next question arise is quality. The research community once accepted IR and 60MHZ NMR is now accepting FTIR and 300MHZ NMR only. Quality research leads to publication in higher impact journals and attracts project funds. So we are calibrated by the quality of instruments we have and application oriented projects. For example if we submit a paper by recording only NMR, it finds difficult for acceptance in journals compared with one having XRD. Similarly synthesis and characterization of a compound which has no practical application does not attract fund as well finds no journal. But if we prepare a compound and do conductance studies in the conductivity bridge and do the same in electrochemical workstation, the latter paper is published in journal with impact factor more than 5, and here one of our advisors practically achieved. Research consists of three parts viz. preparation, characterization and application. Here FTIR, UV-VIS, NMR and XRD are some of the characterization instruments. These instruments need higher initial cost along with maintenance cost but only useful for identification, that data we can get from elsewhere in nominal charges.

A major hurdle before us is fund, for that we look for the government, here I am proud to say our department has received Rs.65 lakhs of UGC fund and Rs.15 lakhs project proposals are in process. All these are possible only when our research is focused on environment, drug and energy. In the environmental aspects we do research in green synthesis, pollution and dye degradation. As for as drug is concerned we focus on synthesis of pure compounds in single crystal form, DNA binding, docking, cyclic voltammetry,

biological studies, cancer drugs and so on. In Energy aspects electrode, solid/liquid ac/dc conductance, photocell etc. Through which we have a good number of quality publications and they are instrumental in receiving such a huge fund.

At this point electrochemistry comes to the center of attraction. Using electrochemical techniques we can synthesis, test organic and inorganic compounds by CV and polarograms of different kinds. The applications can be done by recording resistance, conductance, inductance, solid and solution behavior, pollution, dye, energy harvesting, photo and electrochemical cells and probes. Therefore electrochemical instrument can fulfill the need of a department and help about 30 research scholars to complete their research simultaneously in ease. We record an electro gram in 5 minutes and process the data in the computer later to get approximately 20 parameters. Each parameter can give a table and figure and make a way for publication, getting funds and completing research. Thus electrochemistry is the future and affordable to all. Electrochemical workstation is a maintenance free, multipurpose, portable instrument available in an affordable cost of 5-10 lakhs. Further we can lend the service of this instrument by recording CV and impedance for a reasonable amount and that amount can be used for the maintenance of the research lab and motivate the researchers.

LIFE SKILLS TRAINING PROGRAMME REPORT

The Counselling Cell organized a three day Training Programme on LIFE SKILLS from 17th March 2021 to 21st March 2021. The target audience was the 1 Year students and hence the first two days were allotted to them. The Programme began at 11.15am in the Seminar Hall on 17th March 2021 for the 1 Year UG Girl students. It started with an invocation. Mrs. Adeline Lydia, Assistant Professor of Physics and a Member of the Counselling Cell welcomed the guests of honour Mr. Prem Kumar Peter and Mrs. Sally Grace Peter, FACT, Pondicherry and the participants. The choir under the guidance of Dr. Caroline Daisy, Assistant Professor of Chemistry and Mr. S. Gabriel Sathish, Assistant Professor of Management, took charge of the stage for fifteen minutes. The first session lasted for around an hour and fifteen minutes until 1.00p.m. The second session resumed at 2.15p.m. A total of 156 students participated in the event on the initial day. The first day programme ended at 3.30p.m. The same time schedule was followed on all the three days.

The recipients of the training on Day 2 were the 1 Year Boys from most of the disciplines. 92 boys attended the meeting. The topics addressed on these two days were addictions with particular focus on alcoholism and mobile phones. Moreover, they also covered issues like attraction towards the opposite gender, suicide, importance of studies and facing difficult situations in life.

Pre-marital counselling was the talking point on the 3rd Day of the Training Programme. The Post Graduate students and interested final year UG students were the beneficiaries on 19th March 2021. There was an overwhelming response from the final year and PG students so much so that the number was restricted to 184. Mrs. and Mr. Peter pointed out the differences in the anatomy of men and women and hence the variation in the thought perspective between them. Further, they showed the responsibility involved in marriage and the ways to handle it.

The students were asked to drop their clarifications in a box which they did eagerly. Doubts were explained in the afternoon sessions. PowerPoint, videos and role play by the speakers enabled the students to have a practical glimpse of life. Oral feedbacks given by the students at the end of the day brought out the utility and the realistic value of the Training Programme. A few students approached the speakers for counselling after the end of the Programme.
